About the Conference

The International Conference on Magnetic Fluids (ICMF) has been regularly organized every three years since 1977. The last conference, the 15th ICMF, was held in Paris (France), from July 8 to 12, 2019, and the 16th ICMF was originally planned for the year 2022. However, because of the global pandemic situation, the Steering Committee decided to postpone the 16th ICMF for one year. Thus, the 16th International Conference on Magnetic Fluids is scheduled to be held in Granada (Spain), from **June 12 to 16, 2023**, at the Faculty of Sciences of the University of Granada.

As in previous ICMF conferences, we will welcome researchers involved in the science of magnetic fluids, at large, from liquid dispersions to more complex systems such as magnetorheological fluids, magnetic gels, biocolloidal systems, etc.
